

COMPRESSION

BRASS COMPRESSION FITTINGS FOR COPPER PIPE

APPLICATIONS

Installations covering the distribution of hot and cold water, heating systems, solar thermal as well as numerous other industrial applications mainly involving the use of copper tubing and brass compression fittings.

INSTALLATION INSTRUCTIONS

1
CUT
Cut the tube square with a tube cutter and re-round.

2
DE-BURR AND CLEAN
De-burr and clean the end of the tube using steel wool. The interior surface of the fitting must be perfectly clean.

3
PLACE
Place the nut and the olive onto the tube (fitting is disassembled).

4
PUSH
Push the tube into the assembled fitting until it reaches the tube stop.

5
SCREW
Push the tube into the fitting body until it reaches the tube stop. Bring the nut and olive to the body and hand tighten.

6
TIGHTEN
Tighten the nut onto the body using a suitable spanner in accordance with the requested torque valves.
